

Characteristics	Applications	Special Forms
<ul style="list-style-type: none"> Injection moulded thermoplastic bearing materials in non-standard forms, materials or tolerances Increased application possibilities with typical of solid plastic bearings, i.e. low weight, corrosion resistance, damping properties, etc. Manufactured by precision injection moulding Versatility in design, with integration of additional functions through complex geometries, i.e. snap-lock mounting, spherical bearings, grease/oil grooves, etc. Injection moulding to precise tolerances possible, i.e. $\pm 10,0 \mu\text{m}$ on MF62 bushes 	<p>Automotive</p> <ul style="list-style-type: none"> Customized products <p>Industrial</p> <ul style="list-style-type: none"> Customized products <p>Other</p> <ul style="list-style-type: none"> Customized products 	 

Composition & Structure	Operating Conditions		Availability
Injection moulded thermoplastic material	dry	dep. on bearing	Ex Stock • N/A
	oiled	dep. on bearing	
	greased	dep. on bearing	
	water	dep. on bearing	
	process fluid	dep. on bearing	
			To order • Customized products for any application
