

AIMING FOR PRECISION

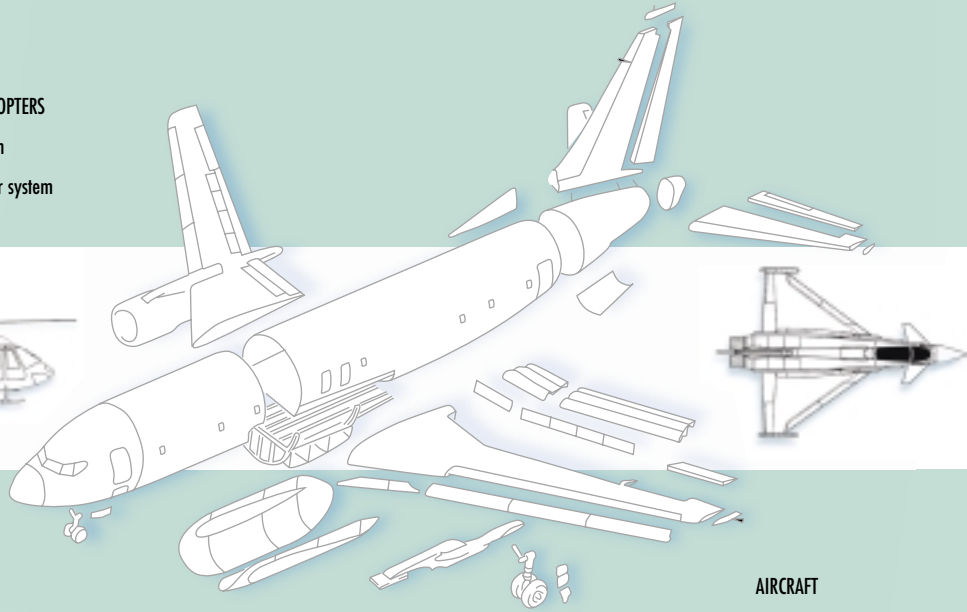

Examples for the application of RWG products:

**RACING CARS**

- Undercarriage
- Steering system

**HELICOPTERS**

- Cabin
- Rotor system

**AIRCRAFT**

- Landing gears
- Cockpit-Controls
- Fuselage
- Flap systems
- Stabilizer
- Aileron
- Doors
- Flight controls

RWG Frankenjura-Industrie Flugwerklager GmbH Company is one of the world-wide leaders in producing aircraft bearings for international industries and is a strategic supplier to aircraft manufacturers and related systems. Further, we are active in machine building and motor car racing segments.

RWG has evolved from the construction of 4 base types of bearings to the customized manufacturing of complex high-precision bearings. Each one of our bearings is developed, tested and approved according to the requirements of a specific project. We cooperate as partners with the technical department of our customers to develop customized products which offer optimal and tailor-made solutions. If necessary, even with short notice! Flexibility is one of our strengths – thanks also to our modern production premises and highly specialized staff.

Our know-how is channeled entirely into meeting the challenging requirements expected from a bearing: regardless of the mechanical and thermal requirements, RWG products distinguish themselves always for their top reliability and long service life.

Standard type:  
**ROD END**

Standard type:  
**JOURNAL BEARING**

Standard type:  
**PLAIN / SPHERICAL PLAIN BEARING**

Standard type:  
**ANTI-FRICTION BEARING**

# CUSTOMIZED HIGH-PRECISION ITEMS

Over the years we have extended our product range, now more than 15,000 different items – and every single one of them is truly a high-precision product!

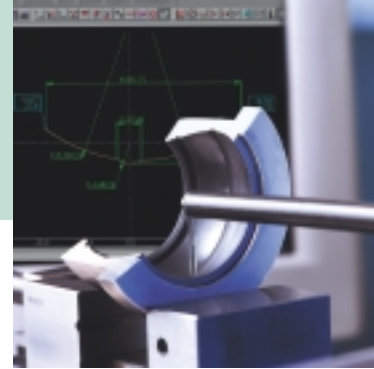

## “TOP” QUALITY...

Design/Development

Manufacturing

Quality control

... This is the leitmotif of our company and the goal that we pursue every day. Each production stage for every single item is closely monitored and recorded.

As a certified aerospace company (DIN EN ISO 9001, JAR-21G) our clients are convinced of the effectiveness of our quality management system through the regular audits. Our products are all authorized by the manufacturers of aircraft and systems.

## TRADITION....

... For 60 years now! Our history dates back to 1943 when the FJG Frankenjura-Industrie firm in Erlangen was established. 1993 saw the founding of a new company: RWG Frankenjura-Industrie Flugwerkklager GmbH. The company as it is today is based in Dachsbad near Nuremberg and since 2002 it is an independent subsidiary company of the US group Kaman Corp. of Bloomfield, Connecticut.
